Subject: protest against cutting any scientific info to protect us!

As a tax-paying citizen of the U. S, I want to fiercely protest Scott Pruitts' proposal to reduce the scientific input available about the toxins put out by industry that harm both humans and the environment. It is a short sighted attempt to cake to greed and reckless disregard for our children and future generations. It stuns me that he can be so small in his thinking and so committed to destruction. Bonnie Lawlor, North Bend WA
